# LIFTMASTER MOTORS

**LiftMaster**

POWERED BY myQ

LiftMaster is the number one brand of professionally installed residential garage door openers, as well as a leading manufacturer of commercial door operators, residential and commercial gate operators, telephone entry systems and related access control products.

Driven by the access and security needs of the marketplace, LiftMaster's expansive line of state-of-the-art residential and commercial products are designed to fit any lifestyle or application, providing the latest technology and innovations in safety, security and convenience.

## LM750EVGB

The LiftMaster LM750EVGB is the best solution for your rolling doors, fast, silent & powerful DC motor with soft start and soft stop. Self-locking gear system when garage door is closed. Compatible with myQ smartphone operation when used with the myQ Internet Gateway accessory and photocells

## LM100EVF

From the 'Evolution' series from Chamberlain LiftMaster, the LM100EVF is a maintenance free, ultra-quiet and fast garage door opener including a built-in multi-frequency radio receiver and state of the art powerful LED light system. This garage door opener also boasts the new and innovative 'myQ' technology allowing you to open your garage door from your computer or mobile phone!

## LM3800W

The LiftMaster LM3800W sets new standards. It is the first opener on the market to have an integrated Wi-Fi interface. It is capable of moving garage doors weighing up to 130 kilograms with maximum dimensions of 3.00 metres in height and 5.50 metres in width. Soft start and soft stop ensure smooth opening and closing.

# THERMAROLL GARAGE DOOR

Subtly contoured and curved, the slat design is a classic. The door is made from interlocking twin walled aluminium slats each with a strengthening rigid foam core.

ThermaRoll 77 has a 77mm deep profile and is available in all sizes and finishes to suit single and double openings in a range of 11 finishes. It is Certified to the Secured by Design standard.

ThermaRoll 55 has a 55mm deep profile that is more compact when rolled up and is ideal for garages with limited headroom, requiring just 205mm headroom. It is available to suit single size openings in a range of 6 finishes.

# BENEFITS OF THERMAROLL

## CONTEMPORARY LOOK

Available in 77mm and 55mm the ThermaRolls gentle curve of each slat with subtly defined strengthening ribs creates a pleasingly aesthetic look that is equally at home on modern or traditional homes.

## DRAUGHT RESISTANT

The ThermaRoll has interlocking foam insulation filled slats and travels in lined guides with an end rubber seal that help block cold draughts.

## SECURITY IS PARAMOUNT

Our ThermaRoll is made with 0.5 gauge thick steel for maximum strength. Combined with solid lock rods & metal lock body this creates optimum security.

## SPACE EFFICIENT

The door curtain rolls tightly above the opening without the door or tracks projecting inside your garage leaving more storage space in the garage.

# MAGROLL GARAGE DOOR

Medium density polyurethane foam filled laths → ensure good insulation properties for your garage door.

2 layer high build paint ensures years of maintenance free use. →

Magroll Garage Doors offer an ideal solution to install in an circumstances, as a renovation or in a new build. Magroll Garage Doors are made of insulated aluminum profiles, which are characterized as light in weight and strong.

Magroll Garage Doors provide a high level of safety, a high level of insulation and are easy to operate. The door rolls up into a compact diameter where limited head room is available.

Special Fixing Hangers provide aa secure connection from Barrel to top Lath and keeps the door securely closed

Manual Override is a standard feature on all of our Insulated Roller doors, so in the event of a power cut you can still open and close your garage door

# TREND SECTIONAL DOORS

## ABOUT THE TREND RANGE

**Without doubt automated sectional garage doors are a top performer. They are very reliable, safe and really really secure. Our door is constructed from 40mm thick double steel skin panels with PU insulation. You'll notice a considerable difference if your door is attached to your home and really feel the warmth and security plus the benefit of noise reductions and cost savings on your heating.**

**Trend Series garage doors are economical and functional doors of 40 mm thickness with fittings made of galvanized steel, which are optimally suited for regions with temperate and cold climates.**

**They comply with European standards; in addition all the safety systems are available at no additional charge. The standard door package includes a spring with a maximum lifetime when compared to competitors—of up to 25,000 open/close cycles. Trend Series garage doors are safe and practical doors at a reasonable price.**

# MAGROLL SECTIONAL DOORS

## ABOUT THE MAGROLL DOOR

The Magroll brand of sectional doors brings you the very best in quality & reliability. All the panels and components used in the manufacturing of our doors are produced by Ryterna, one of the largest and most well respected brands in Europe.

All doors are made specifically to your size and requirements, and each door is produced from 40mm polyurethane foam-filled panels with a steel outer & inner skin. The steel is factory hot-dipped, galvanised, primed, and finally painted in a colour of your choice. This provides a very long lasting corrosion resistant finish.

All doors are spring counter-balanced by using various types of spring system, depending on requirements and suitability. Automation can be supplied with your door and the choice of operator can be discussed with your installer. By purchasing a Magroll door you are ensuring a top quality, durable and long-lasting door. We also provide sectional door motors to suite the door application.
